Satellite Dish Installer Registration

Date _____

Company Name _____ Address _____

City _____ State _____ Zip _____

Contact person _____ Phone _____

I hereby acknowledge and agree to the City of Tuscola dish installation requirements as follows:

That satellite and data dishes, i. e., video antennas including direct-to-home satellite dishes that are less than one meter (39.37") in diameter, TV antennas, and wireless cable antennas:

1. Are allowed anywhere on the property, including on existing structures, as long as it meets the accessory structure setbacks for the front, rear, and side yards.
 - A. Front yard – 25' from the property line (18' 9" if property recorded before 1954).
 - B. Rear yard – 10' from the property line
 - C. Side yard – 6' from the property line

All setbacks are measured from the property line. On a corner lot, the yards facing streets require a front yard setback and the other two require a side yard setback.

2. Installations will meet the requirements of the current adopted (by the City of Tuscola) version of the National Electric Code and International Building and Fire Code.
3. Installers will provide documentation of installation locations to the Building Department, in the form of a signed affidavit from each customer, that they understand that the location of the dish must meet the above requirements.
