

CITY OF TUSCOLA WATER DEPARTMENT CROSS CONNECTION SURVEY

WATER SERVICE ADDRESS: _____

NAME OF PERSON COMPLETING SURVEY: _____

Phone: _____ Email: _____

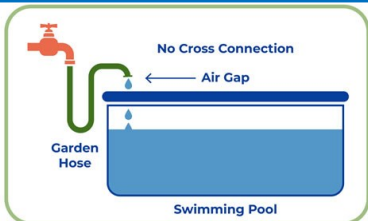

The City is required to conduct this survey of all connections to our public water supply every 3 years. Please return the survey promptly to assist us in meeting this requirement and protecting our water supply for all users. For more information about this survey or cross connections in general, visit www.tuscola.org/crossconnection, email info@tuscola.org, or call us at 217-253-2112

DESCRIBE THE CITY WATER USE AT THIS LOCATION:

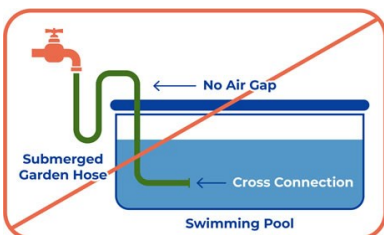

TYPICAL HOUSEHOLD USE (Typical use is bathrooms, drinking water, residential type kitchen use, etc)

OTHER (medical, dental, construction, process, etc.) _____

DOES THIS WATER SERVICE ADDRESS HAVE:	YES	NO
Swimming pool, pond or hot tub?		
When filling a pool, pond or hot tub, will you use the air gap method as illustrated?		
Private well ?		
Is the well in any way connected to the same plumbing that is connected to the public water supply?		
Underground, permanent piped lawn sprinkling system that <u>IS connected</u> to the city water supply?		
A fire suppression system (sprinklers)?		
If there is any type of backflow prevention device (RPZ or double detector check valve assembly) installed at this location, on what equipment or system is it installed? _____		

A cross connection exists when the City water supply is connected, through a private owner's plumbing, to non-potable water or other substance, that could contaminate the public water supply should a backflow condition occur. Using an air gap when filling will help protect our water supply!
